Career Objective

Full-stack developer with 6+ years of experience building scalable web applications using the MERN stack. Skilled in designing RESTful APIs, developing responsive UIs, and delivering end-to-end solutions. Familiar with AWS services and cloud fundamentals; learning to extend backend solutions toward cloud-native architectures. Seeking to contribute technical leadership and cloud expertise to a service-based organization focused on high-impact digital solutions.

Skills

Core Competencies

- **Frontend Development:** React.js, Angular, Next.js, Redux, Tailwind CSS, Styled Components, Storybook
- **Backend Development:** Node.js, Express.js, NestJS, Microservices Architecture, MongoDB, MySQL, Redis
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, CloudFront, IAM, etc.), Docker, ECS, Netlify, CloudWatch
- **CI/CD:** GitHub Actions
- **Tools & Testing:** Postman, Swagger, SonarQube, ESLint, Visual Studio Code
- **Version Control:** Git, GitHub

Work Experience

Senior Software Engineer

Advanced Millennium Technologies Pvt. Ltd, Bangalore

12/2021 – Present
Bangalore

- Led requirement analysis sessions and translated client/business needs into clear technical specifications
- Developed scalable and reusable UI components using **ReactJS**, **Angular**, and **Storybook**, improving design consistency and reducing frontend development time
- Built and integrated RESTful APIs with frontend apps to enable seamless data flow and user experience
- Owned key application modules, implementing enhancements that improved reliability and maintainability
- Mentored junior developers, conducted code reviews, and promoted clean coding practices across the team

Software Engineer (Full Stack)

App Innovation Technologies, Coimbatore

07/2020 – 11/2021
Coimbatore

- Delivered end-to-end feature development across multiple concurrent projects
- Improved application performance by **30%** through frontend optimization and reduced API response payloads
- Developed responsive UIs with **ReactJS**, and maintained backend logic using **Node.js**
- Collaborated closely with QA to test and debug features, ensuring quality releases

- Participated in daily stand-ups, sprint planning, and client meetings as part of Agile teams

Software Engineer

GR Systems, Coimbatore

05/2019 – 06/2020

Coimbatore

- Built REST APIs and implemented dynamic frontend features using **JavaScript, ReactJS, and Angular**
- Worked on bug fixes and performance tuning in legacy systems
- Contributed to UI development for internal dashboards and customer-facing portals
- Gained hands-on experience in implementing full-stack solutions under mentorship

Education

B.E. in Electronics and Communication Engineering

Sona College of Technology, Salem

07/2014 – 04/2018

Salem

Projects

NRC – Full Stack Developer

Humanitarian Aid and Resource Planning Platform

- Built core modules to support resource tracking and aid distribution for displaced populations
- Worked on secure authentication and authorization flows using **Keycloak** and **Okta**
- Contributed to a distributed system architecture using **NestJS, Angular, MongoDB, NX, and RabbitMQ**

FOOTPRINTS – Full Stack Developer

CRM System for Sales and Analytics

- Developed interactive dashboards and reporting features for sales performance and analytics
- Integrated **Google Maps, Google Ads, and Facebook Ads APIs** to enhance marketing insights
- Stack: **ReactJS, NodeJS, MongoDB, Redis**

MY TICKETS POS – Full Stack Developer

Ticket Inventory and Sales Platform

- Engineered real-time inventory management and sales tracking system
- Implemented user roles, checkout flow, and analytics for vendors and admins
- Stack: **ReactJS, NodeJS, MySQL**
